

# Bouzidi Abderrahim

Senior Web Developer

## Profile

Web Developer with over 6 years of experience specializing in JavaScript technologies like Next.js, React.js, TRPC, React Query, Express, and TypeScript. Proven ability to build scalable, responsive web applications, with a strong focus on performance and user experience. Skilled in both frontend and backend development, including API design and database management. Collaborative team player, passionate about clean, maintainable code, continuous learning, and delivering high-quality solutions that meet business goals.

## Employment History

### Full Web Stack Developer at Flux Interactive

January 2025

- Developed a POS system called Logix, mainly focusing on the front end (95% of the UI/UX). I also did work on the back end using tRPC and some database updates (PostgreSQL) using the ORM Drizzle.

### Full Web Stack Developer at Growth Lab Media, Québec

November 2023 — January 2025

- Developed multiple professional projects such as The Web Is Mine (the main website), Siana, Dupond et Dupont, Credit +.
- Implemented Web socket for multiple project such as Deals of the Day, PLP.
- Developed a responsive website that is optimized for both desktop and mobile devices, increasing user engagement by 95%
- Implemented a single-page application using React and React Query that improved overall performance and usability

### Full Web Stack Developer at Lynck Tech Solutions

April 2023 — October 2023

- Contributed to the development of professional projects such as Sandbar, Neat, the Forge. Utilized a wide range of technologies including JavaScript, React.js, Next.js, Express, and SQL for front-end and back-end development.
- Demonstrated strong communication and teamwork skills in collaborating with project teams to achieve successful project outcomes.
- Gained valuable experience in project management and effective team collaboration.
- Continuously seeking to enhance skills in Next.js, Express, and TRPC to further contribute to project success.
- Created a reusable component library for the web application using Tailwind and DaisyUI, resulting in faster development time for new features
